Protocol's proHTMS make inroads to Indian Highways

Protocol Automation Technologies Pvt Ltd is a software solution house based in Bangalore, serving the Automation Industry with time tested quality products, services and support since they started operation in 1994.

Protocol Automation Technologies has developed Advanced Traffic Management Solution for Highways project for one of the most renowned Infrastructure companies in India: L&T IDPL - L&T Infrastructure Development Projects Limited

This project was awarded to protocol by Arya OmniTalk, India's Leading Walkie Talkie & GPS Vehicle Tracking Service Provider.

Arya Omnitalk is a joint venture/endeavour between JM Baxi Group and Lalbhai Group – Arvind Ltd. In the year 2002, Arya Communications and Omnitalk joined hands and separated their operations into a new company known today as Arya Omnitalk Wireless Solutions Pvt. Ltd, marketing Walky Talky and GPS Vehicle Tracking Systems under the brand name Arya Omnitalk.

L&T Infrastructure Development Projects Limited is a pioneer of the Public-Private-Partnership (PPP) model of development in India, which involves the development of infrastructure projects by private sector players in partnership with the Central and State Governments.
